

1

In the realm of science, a tale to unveil,  
A feat so unique, in a grand-scale trail.  
It's the "Genome Project," a remarkable quest,  
An ambitious beginning, an ideal at its best.

2

In universities, where knowledge takes flight,  
Dreaming scientists toil, fueled by insight.  
The human genome, a puzzle to face,  
Despite weariness, they continued to trace.

(Chorus)

And here, "Genome Project,"  
in cordel, we'll narrate,  
Life's mysteries unfold, a captivating fate.  
Science in motion, its force we declare,  
To the world, the tales we'll share.

3

Scientists worldwide,  
In collaboration's stride,  
United with such might,  
And determination's light.  
No one stepped away,  
Holding hands, they'd stay.

4

Even with goals so bold,  
They didn't falter, strong and bold.  
Through shared data, side by side,  
Together, they worked with pride.  
This is called purpose, true,  
For this, their dedication grew.

(Chorus)

And here, "Genome Project,"  
in cordel, we'll narrate,  
Life's mysteries unfold, a captivating fate.  
Science in motion, its force we declare,  
To the world, the tales we'll share.

5

DNA is the code,  
For our existence it strode.  
At the heart of the research quest,  
Persistence proved to be the best.  
Many hours of analysis in the light,  
With resilience, they faced the night.

6

For acids, for bases,  
Genes to unravel, diverse cases.  
A grand genetic puzzle to assemble,  
Challenges that made their minds tremble.

Judgment heated, yet, it's clear,  
Dedicating was good, no fear.

(Chorus)

And here, "Genome Project,"  
in cordel, we'll narrate,  
Life's mysteries unfold, a captivating fate.  
Science in motion, its force we declare,  
To the world, the tales we'll share.

7

In an intense race,  
Our science made its pace.  
Incredible discoveries unfold,  
At every stage, the story told.  
Each step forward on this course,  
Was good, motivating, a powerful force.

8

Genetic diseases laid bare,  
So many risks in the air.  
Through the "Genome Project" gaze,  
A new, beautiful horizon ablaze.  
Guiding us toward a brighter day,  
Where potential breakthroughs stay.

9

Indeed, the human genome,  
Sequenced and decoded,  
A triumph of science,  
A feat widely applauded!  
Yet, open access to the data,  
A legacy to be cherished.

10

For future generations,  
We must always recall:  
All this knowledge we hold,  
We ought to share it all.  
It's a legacy we leave,  
A heritage to enthrall.

(Chorus)

And here, "Genome Project,"  
in cordel, we'll narrate,  
Life's mysteries unfold, a captivating fate.  
Science in motion, its force we declare,  
To the world, the tales we'll share.

11

Many sleepless nights endured,  
For it demanded dedication.  
Countless minds pondered,  
In cooperative inclination,

The noble "Genome Project"  
Became a source of inspiration.

12

Seeking understanding,  
Of life in its very essence,  
With science advancing,  
Always with great patience,  
Gradually revealing  
The wisdom-laden data.

(Chorus)

And here, "Genome Project,"  
in cordel, we'll narrate,  
Life's mysteries unfold, a captivating fate.  
Science in motion, its force we declare,  
To the world, the tales we'll share.

13

We must remember well,  
This story with clarity,  
Science is crucial,  
A fact with unanimity!  
Let's not forget,  
The enormity of this rarity.

14.

For the "Genome Project" stands,  
A milestone to celebrate,  
In the journey of knowledge,  
Its brilliance doesn't abate.  
And on a day like this,  
We shall acclaim its fate.

(Chorus)

And here, "Genome Project,"  
in cordel, we'll narrate,  
Life's mysteries unfold, a captivating fate.  
Science in motion, its force we declare,  
To the world, the tales we'll share.
